

End-term workshop "Climate Predictability & Inter-regional Linkages"

Looking at achievements & future research priorities

Day 2 – Refresher: Goals of the workshop

Johann Muller, on behalf of the Theme Program Office/Call Secretariat
(ANR, France & MoES, India)

BELMONT
FORUM

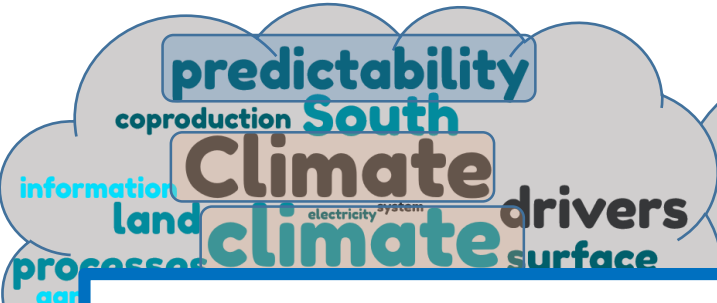

Goals of the workshop – Day 1

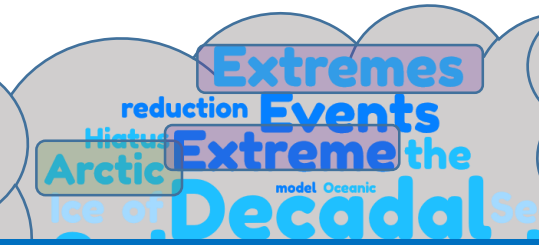

To gather outcomes, outputs, lessons learned on different aspects: transdisciplinarity & networking, research achievements, added value...

The breakout sessions will be synthesised in short presentations to provide an overview of the rich discussions

What could be the composition of these clouds today and tomorrow?

PREREAAL

INTEGRATE

Goals of the workshop – Day 2

To identify knowledge gaps arising from projects' outcomes & frame possible future research directions.

Explore approaches to achieve the gaps identified

- Transdisciplinarity
- Networking & connectivity
- Relevance to policy, operations, practice
- Professional development

Perspectives from science, stakeholder, early career scientist on expectations at the time of the Collaborative Research Action launch and for the future

- Guy Brasseur (Max Planck Institute for Meteorology)
- Claude Nahon (Institute for Sustainable Development and International Relations)
- Robert Lee (InterDec)
